

LIMITANTES PARA A PERDA DE REGULARIDADE PARA UMA CLASSE DE OPERADORES FRACAMENTE HIPERBÓLICOS

RAFAEL KAPP*

Neste trabalho determinaremos limitantes ótimos para a perda de regularidade, na escala de espaços de Sobolev, para o problema de Cauchy fracamente hiperbólico

$$\partial_t^2 u - \lambda^2(t) \sum_{i,j=1}^n a_{ij}(t) \partial_{x_i x_j}^2 u + \lambda(t) \sum_{i=1}^n c_i(t) \partial_{t x_i}^2 u = g(x, t, u, \partial_t u, \lambda'(t) \nabla_x u),$$
$$u(x, 0) = u_0(x), \quad \partial_t u(x, 0) = u_1(x).$$

Serão discutidas condições para os casos linear e semi-linear.

Este é um trabalho desenvolvido em colaboração com Marcelo Rempel Ebert e José Ruidival dos Santos Filho.
